Other	
<p>Alan Randall is Professor and Head of agricultural and resource economics at the University of Sydney, having served previously at The Ohio State University for 25 years, 12 of them as department chair. He specializes in environmental economics and policy, with particular interests in environmental risk; biodiversity, habitat and environmental sustainability; environmental regulation, monitoring, and enforcement; and the benefits and costs of environmental projects and programs. His writings include Risk and Precaution (Cambridge 2011), Making the Environment Count: Selected Essays, (Edward Elgar, 1999), Resource Economics: An Economic Approach to Natural Resource and Environmental Policy (Wiley, 1981, 1987; and Elgar, 2010 with John C. Bergstrom), and numerous journal articles. He is active in professional associations and on editorial boards, and has served on the National Research Council standing committee on human dimensions of global change and several NRC panels dealing with environmental policy issues.</p> <p>Professor Randall is a Fellow of three scholarly societies (American Agricultural Economics Association, Australian Agricultural and Resource Economics Society, and Association of Environmental and Resource Economists), and serves currently as president-elect of AARES. He is an Ohio State University Distinguished Scholar and has received the University Award for Distinguished Faculty Service, and holds honorary doctorates from the University of Sydney and the Norwegian University of Environment and Life Sciences.</p> <p>He earned the PhD degree at Oregon State University in 1970, following BS and MS degrees from the University of Sydney.</p>
