| <b>Other</b>   |   |
| <p>Vladimir Trukhachev (1955) - Doctor in Agricultural Sciences (1998), Doctor in Economics (2006), Professor (2002).</p> <p><b>The main trends of scientific research:</b> biological and physiological features of fine-wooled sheep and swine in respect of feed ration. Inertness influence of cyclical dynamics trends on the course of post-crisis development of the agrarian economical sector of Russia and its regions. Prof. Trukhachev is a co-author of scientific discovery "Regular connection between the live weight of endothermic animals and the optimum temperature of environmental air for them".</p> <p>Vladimir Trukhachev with the staff of the University develops regional dairy cattle husbandry, sheep and pig breeding. For this purpose the scientific laboratory "Fodder and metabolism" was established on the base of the University. The laboratory activity allowed to make the complex analysis of nutritious and bioactive substances 20 times faster (comparing with the traditional method), to increase livestock productivity and cattle breeding profitability by 30-50% (prize of the Competition of Young Scientists Alltech (the USA)).</p> <p>V. Trukhachev combines the position of scientist, teacher, head of the higher professional education with great social activity. Since March 2007 to the present day Vladimir Trukhachev is a deputy of State Duma the Stavropol Region and a member of the Committee on agrarian issues, provisions, land relations and land management. As a deputy, V. Trukhachev takes part in determination of the strategy and practical solution of social and economic issues of the Stavropol region. Vladimir Trukhachev is an Honorary Professor of the International University in Vienna, Austria (2009).</p> |   |
